

Directory of indoor and outdoor space available to hire  
within the Bedlington Schools Partnership.

In response to the Government's Extended Services agenda, all schools are looking at enabling the facilities and resources they have to be more available for use by the local community during the times when the school is not currently open, such as in evenings, weekends and school holidays.

This directory of facilities within the Bedlington Schools Partnership is being made available to local community groups and organisations to raise awareness of the indoor and outdoor space that may be available to hire in each local school. Resources such as IT suites, art and sports equipment may also be available to hire in some schools.

Each school has its own letting and charging policy and can negotiate over individual requirements with groups and organisations – just contact the school directly to discuss further.

# Bedlington Partnership - Schools

**Other school facilities :**

Classrooms: these may be available in certain circumstances, although as they contain children's own belongings and work, public use would generally be more difficult.

School kitchens: There may be legal issues to be addressed on a wider level than at the school, so school kitchens are not included in this list currently.

*Please contact individual schools to discuss further.*
